

How to use KloguBizz, step by step

Fifteen steps, in the order you will need them. Every step shows the actual screen, so you can match what is in front of you to the picture.

Steps 1–4 set-up, once **5–7** your customers and products **8–12** every day **13–14** GST time
15 on your phone

CONTENTS

Set up — do this once

- 1 Create your account
- 2 Fill in your business details
- 3 Set your own bill numbers
- 4 Make the bill look like yours

Add your customers and what you sell

- 5 Add one customer
- 6 Add all your customers at once
- 7 Add what you sell

Every day

- 8 Make a bill
- 9 Look at the finished bill
- 10 Write down a payment
- 11 See who has not paid
- 12 Check your dashboard

At GST time

- 13 Your GST returns
- 14 Reports

On your phone

- 15 Put it on your home screen

A Set up — do this once

1

Create your account

- 1 Go to the sign-up page.
- 2 Type your name, your business name and your email.
- 3 Pick your **state** from the list.
- 4 Choose a password and press **Create Account**.

You get 14 days free. No card.

WHY IT MATTERS

Pick the state your business is registered in, not where your customer is. This decides the tax on every bill you make.

The screenshot shows the Klogu Bizz sign-up page on the left and a sample invoice on the right. The sign-up page has the following fields:

- YOUR FULL NAME:** Priya Sharma
- COMPANY NAME:** Acme Traders Pvt Ltd
- WORK EMAIL:** you@company.com
- PASSWORD:** At least 8 characters
- STATE (FOR GST):** Maharashtra (27)

Below the fields, there is a checkbox for "I agree to the Terms & Conditions and Service Level Agreement" and a "Create Account" button.

The sample invoice on the right is titled "TAX INVOICE" and "INV-2026-0842". It shows the following items:

Item	Amount
Consulting Services	₹45,000.00
CGST (9%)	₹4,050.00
SGST (9%)	₹4,050.00
Total Due	₹53,100.00

The invoice also includes a "Paid" button and a "Launch-ready from day one." section with the following features:

- ✓ Tenant isolation
- ✓ Invoice numbering
- ✓ Free trial
- Isolated data per organisation
- Encrypted credentials
- No credit card required

The sign-up page. Only five things to fill in.

2

Fill in your business details

Open **Business Profile** from the left menu.

- 1 Type your **GSTIN**. The page checks it as you type.
- 2 Type your full **address**.
- 3 Add your phone number.
- 4 Press **Save Changes**.

CAREFUL

Do not skip this. A bill without your GSTIN and address is **not a valid tax invoice**. Your customer cannot claim input credit on it, and they will only find out months later.

Aurora Industries Pvt Ltd > Business Profile

Search or ju **Ctrl K**

Priya Menon
Admin

Business Profile

What appears as the seller on every invoice you issue

Business Identity

Printed at the top of every invoice, quotation and delivery challan.

REGISTERED BUSINESS NAME

Aurora Industries Pvt Ltd

Exactly as it appears on your GST registration.

GSTIN

27AAPFU0939F1ZV

Valid - Maharashtra (27)

PAN

AAPFU0939F

Optional. Characters 3 to 12 of your GSTIN are your PAN.

Address and Contact

Your place of business, and how customers reach you about a bill.

ADDRESS

Unit 4, Kalpataru Estate, Andheri East, Mumbai 400093

STATE

Maharashtra (27)

This decides whether each invoice charges CGST + SGST or IGST — a customer in your state is intra-state, anywhere else is inter-state.

PHONE

022 4800 5000

Printed under your address on the invoice.

Save Changes

Your logo, signature, bank details and standing terms live on **Invoice Templates**, alongside the design they appear in.

Business Profile. The green line under the GSTIN means it is a real one.

3

Set your own bill numbers

Open **Invoice Templates** and scroll down to **Document Numbering**.

- 1 Change the prefix to your own initials — for example **AST**.
- 2 Look at the grey line under it. That is the next number you will get.
- 3 Press **Save numbering**.

Moving from another software? Put your last number plus one into **Next invoice number**.

WHY IT MATTERS

Numbers only move forward, never back. Two bills with the same number cannot be undone, so the app will not let it happen.

Document Numbering

The prefix on every document you issue. These were fixed at the platform's own initials until now, so your invoices read KLG— rather than yours.

Numbering restarts at 1 each Indian financial year (April to March). The number resets to 0001 each year.

Aurora Industries Pvt Ltd > Invoice Templates

KLK

NEXT INVOICE NUMBER

19

Next: KLG-2026-019 · 18 issued this year

CREDIT NOTE PREFIX

CN

NEXT CREDIT NOTE NUMBER

1

Next: CN-2026-001

QUOTATION PREFIX

QT

NEXT QUOTATION NUMBER

1

Next: QT-2026-001

PI

NEXT PROFORMA INVOICE NUMBER

1

Next: PI-2026-001

DELIVERY CHALLAN PREFIX

DC

NEXT DELIVERY CHALLAN NUMBER

1

Next: DC-2026-001

Numbering can be moved **forward** — useful when moving from another system and continuing an existing series — but never back. Re-using a number would leave two documents carrying it, and that cannot be undone.

Save numbering

All five document types. Each one keeps its own count.

Make the bill look like yours

Stay on Invoice Templates.

- 1 Upload your **logo**.
- 2 Upload your **signature** — it prints above the signature line.
- 3 Fill in your **bank details** so customers know where to pay.
- 4 Pick a **colour** and a **design**.
- 5 Press **Save Template**.

The picture on the right changes as you go. What you see there is what your customer gets.

Aurora Industries Pvt Ltd

Bank Details

Settings on the left, a live bill on the right.

5

Add one customer

Open **Clients** and press **+ Add Client**.

- 1 Type the customer name.
- 2 Type their **GSTIN** if they have one.
- 3 Pick their **state**.
- 4 Add email, phone and address.
- 5 Press **Save**.

WHY IT MATTERS

Their state is what decides **CGST + SGST** (same state as you) or **IGST** (any other state). Get it right once here and every bill to them is right.

Adding a customer. GSTIN and state are the two that matter.

6

Add all your customers at once

Have a list in Excel, or an export from your old software? Do not type them one by one.

- 1 On **Clients**, press **Import CSV**.
- 2 Press **Download CSV Template**.
- 3 Fill it in — one customer per row. Only the name is required.
- 4 Save it as CSV, press **Choose File**, then **Upload & Add Customers**.

Good rows go in even if some rows have mistakes. Anything it could not add is listed underneath with its row number, so you fix only those.

TIP For **State** you can write the name ([Maharashtra](#)) or the number ([27](#)). If you fill in the GSTIN you can leave State empty — the first two digits of a GSTIN *are* the state.

The import window. Three steps, and the rules are written on it.

7

Add what you sell

Open **Items** and press **+ Add Item**.

- 1 Name it.
- 2 Choose **Goods** or **Service**.
- 3 Type the **HSN** code (goods) or **SAC** code (service).
- 4 Type the price and the **GST rate**.
- 5 Press **Save**.

Now you can pick it on a bill instead of typing it out every time.

TIP Items have a bulk upload too, on the same page. Same idea as customers.

The screenshot displays the Klogu Bizz GST Billing Suite interface. On the left is a sidebar with a 'MAIN MENU' containing links to Dashboard, Invoices, Bill Generator, Quotes & Challans, Recurring, and a 'MANAGEMENT' section with links to Clients, Items (highlighted), Inventory, Payments, Purchases, Receivables, Profit & Loss, Reports, GST Returns, Business Profile, Users & Roles, Subscription, and Security & Privacy. The main content area is titled 'Items' and shows '4 items in your catalog'. It includes a search bar and buttons for 'Bulk Upload' and '+ Add Item'. Below is a table with columns: ITEM, TYPE, HSN/SAC, UNIT, RATE, GST%, STOCK, and STATUS. The table lists four items: 'Annual maintenance contract' (Service, HSN/SAC 998729, Rate ₹1,20,000.00), 'GI Sheet 2mm' (Goods, HSN/SAC 7210, Rate ₹3,150.00), 'MS Angle 50x50x6mm' (Goods, HSN/SAC 7216, Rate ₹82.00), and 'Structural steel fabrication' (Service, HSN/SAC 998314, Rate ₹45,000.00). Each item has an 'Active' status and buttons for 'Edit' and 'Del'. At the bottom, it shows 'Showing 1-4 of 4' and pagination controls.

ITEM	TYPE	HSN/SAC	UNIT	RATE	GST%	STOCK	STATUS
Annual maintenance contract AMC-001	Service	998729	Nos	₹1,20,000.00	18%	0	Active
GI Sheet 2mm GIS-002	Goods	7210	Nos	₹3,150.00	18%	140	Active
MS Angle 50x50x6mm MSA-016	Goods	7216	Kg	₹82.00	18%	2400	Active
Structural steel fabrication FAB-001	Service	998314	Nos	₹45,000.00	18%	0	Active

Your item list. Price, HSN and GST fill themselves in on a bill.

8

Make a bill

Press + **New Invoice** from anywhere.

- 1 Pick the **customer**. Their details appear underneath.
- 2 Pick an **item** on the first line. Price, HSN and GST fill in by themselves.
- 3 Type the **quantity**.
- 4 Press + **Add item** for each extra line.
- 5 Check the **total** on the right, then press **Save Invoice**.

The bill number is made for you when you save.

WHY IT MATTERS

You never choose the tax. Read the green box — it says which tax was applied and why. If it says something you did not expect, check the customer's state.

The screenshot shows the Klogu Bizz GST Billing Suite interface. The sidebar menu on the left includes options like Dashboard, Invoices, Bill Generator, Quotes & Challans, Recurring, Management, Clients, Items, Inventory, Payments, Purchases, Receivables, Profit & Loss, Reports, GST Returns, Business Profile, Users & Roles, Subscription, and Security & Privacy. The top navigation bar shows the user is logged in as Priya Menon (Admin) and is viewing the 'New Invoice' page for Aurora Industries Pvt Ltd. The main content area is titled 'New Invoice' and includes a 'Save Draft' button and a 'Save Invoice' button. The 'Invoice Details' section shows the invoice number as 'Auto-generated on save', the invoice date as '22-08-2026', and the due date as '06-09-2026'. The 'Invoice Summary' section shows a subtotal of ₹0.00, CGST of ₹0.00, and SGST of ₹0.00, with a total of ₹0.00. The 'Bill To' section shows the client as 'Bharat Logistics LLP' with address 'Plot 14, MIDC Bhosari, Pune 411019' and GSTIN '27AACT2727Q1ZW'. The 'Bank Details' section shows the bank name as 'HDFC Bank', account number as '50100XXXXXXX', and IFSC code as 'HDFC0001234'. A green box in the 'Invoice Summary' section indicates 'In words: Zero Rupees Only'.

Making a bill. The green box confirms CGST + SGST, because this customer is in the same state.

9

Look at the finished bill

From the invoice list, press **View** on any bill.

From there you can **Download PDF**, **Print**, or **Email** it straight to the customer.

Aurora Industries Pvt Ltd

A finished bill: your details at the top, theirs below, the tax split, and your signature.

10

Write down a payment

When money comes in, tell the app.

- 1 Open **Payments** and press **+ Record Payment**.
- 2 Pick the bill it is against.
- 3 Type the amount, the date, and how it came (bank, cash, UPI).
- 4 Press **Save**.

Part payments are fine. The bill then shows how much is still due.

The screenshot shows the KloguBizz Payments dashboard. The left sidebar contains a 'MAIN MENU' with options like Dashboard, Invoices, Bill Generator, Quotes & Challans, and Recurring, as well as a 'MANAGEMENT' section with Clients, Items, and Inventory. The 'Payments' option is highlighted. The main content area is titled 'Payments' and includes a subtitle 'Track collections, reminders and history'. It features three summary cards: 'TOTAL COLLECTED' (₹16,47,516.00, 15 successful payments), 'PENDING AMOUNT' (₹0.00, 0 open invoices), and 'OVERDUE AMOUNT' (₹0.00, 0 invoices past due). Below these is an 'AVG. COLLECTION' card showing '170 days' from invoice date to payment date. A 'Payment Tracker' tab is active, showing a search bar for 'Search invoice number or buye'. At the bottom, a large box with a checkmark icon states 'All invoices are paid' and 'No pending, partial or overdue invoices right now.' The top right of the dashboard shows the user 'Priya Menon' with an 'Admin' role and a 'PM' status indicator.

Payments received. Each one is linked to its bill.

11

See who has not paid

Open **Invoices**. The label beside each one tells you where it stands:

- **Paid** money received in full
- **Partial** some money received
- **Pending** not due yet
- **Overdue** past the due date

Use the search box to find any bill by number, customer or amount.

Your bills, newest first.

12

Check your dashboard

This is the first screen you see. In one look:

- how much you have **collected**;
- how much is **still to come**;
- how much is **overdue** — chase these first;
- which months were good, and who your biggest customers are.

The dashboard. Four numbers, then the detail underneath.

13

Your GST returns

Open **GST Returns** and choose the month.

Everything is worked out from the bills you already made — you do not type anything in again. You get **GSTR-1**, **GSTR-3B** and the **HSN summary**, and you can download each one.

TIP

Look at this before the filing date, not on it. If a number looks wrong, the bill behind it can still be fixed.

The screenshot displays the KloguBizz GST Returns interface. On the left is a sidebar menu with sections: MAIN MENU (Dashboard, Invoices, Bill Generator, Quotes & Challans, Recurring) and MANAGEMENT (Clients, Items, Inventory, Payments, Purchases, Receivables, Profit & Loss, Reports). The 'GST Returns' option is highlighted. The main content area shows the 'GST Returns' page for 'Aurora Industries Pvt Ltd'. It includes a search bar, a date selector set to 'July, 2026', and download buttons for 'CSV' and 'GSTN JSON'. Below these are tabs for 'GSTR-1', 'GSTR-3B', and 'Input tax credit'. A warning message states: 'Prepared from your records in KloguBizz. Reconcile against GSTR-2B and your books before filing — this is a preparation aid, not a filing service.' The summary section shows: TAXABLE VALUE of ₹82,000 (1 invoice), TAX of ₹14,760 (IGST ₹0, CGST ₹7,380, SGST ₹7,380), and CREDIT NOTES of ₹0 (0 issued this period). The NET TAXABLE amount is ₹82,000, with a note to reconcile after credit notes. At the bottom, there's a section for 'B2B — registered buyers' with a link to '1 invoice'.

Category	Value	Details
TAXABLE VALUE	₹82,000	1 invoice
TAX	₹14,760	IGST ₹0 · CGST ₹7,380 · SGST ₹7,380
CREDIT NOTES	₹0	0 issued this period
NET TAXABLE	₹82,000	After credit notes — reconcile to this

GSTR-1 for the month, built from your bills.

Reports

Open **Reports** for sales by customer, by item and by month, and for the money still owed to you. Every report has a **Download** button, so your accountant gets a spreadsheet instead of a screenshot.

Reports. Pick a date range and download.

15

Put it on your home screen

It works like an app, and there is nothing to install from a store.

- 1 Open the site in your phone browser.
- 2 **Android:** menu ☰ → **Add to Home screen.**
- 3 **iPhone:** the Share button → **Add to Home Screen.**

Now it opens full screen from your home screen, like any other app. Tap ☰ at the top left for the menu.

The dashboard on a phone.

Tap the ☰ button for the menu.

That is the whole thing

Steps 1 to 4 are done once. After that your day is step 8, step 10 and a look at step 12 — make a bill, write down the payment, check what is overdue.

Anything you change in Business Profile or Invoice Templates appears on the next bill you make. Bills you have already sent stay exactly as they were sent.
